

## Applied Design

### Sketchbook 1

#### Chair Sketching

FILL 2 pages of your sketch book with chairs. If you have a smaller sketchbook you may end up doing more pages. I think 30-40 small sketches is a good number to shoot for. You may add color or shading as you wish. The goal is to think about how chairs are designed and to be able to quickly convey an idea on paper. They can be chairs that have already been designed or chairs you have created. You can do different versions of the same chair.
