Line Project

Goals: To discover how straight lines can show movement

To change value (lightness and darkness) by alternating line spacing

To strengthen hand control

To achieve good craftsmanship (are your lines neat? Is your design well planned and organized? Did you take or time or does it appear rushed?)

- Lines should be drawn in blue or black ink.
- Lines should be 1/8" or less apart.
- Lines should alternate direction.
- Lines should create darker and lighter areas.
- Work should be neat.

Project is due: Monday August 12

Be sure to include your name and block # on the back
