

## Paper Sculpture

### Assignment Requirements:

Create a paper sculpture using one or several of the methods we tried in class to form, shape, attach and present paper in 3D. Consider the overall look of your sculpture and how you have used repetition, balance and harmony. Think about the idea that if this sculpture was placed in a setting where would it be and why would this form be good for that space.

Your sculpture should:

Be at least 12 inches in either height or width

Use multiple pieces of paper

Include some type of repetition

Demonstrate knowledge of paper attachment

Be mounted on black or white paper

Should be able to self-support

Be abstract OR realistic

Include a title (not visible-put on the underside of the mounted paper)

Be visually appealing (well planned, balanced, well crafted)

Optional:

Be lit if desired (I have flameless candles if you need one)
