

Sketchbook 13

Research a famous artist or art movement and determine the style characteristics that are unique to that artist or time period. Create a sketch using those specific style characteristics.

Make sure your work is complete and true to the artist you select. You ARE NOT copying their exact work. Come up with your own image and complete it in their style. For example if you select VanGogh you will create your image using lots of lines and movement. If you select Picasso's Blue Period, you will create a drawing using shades and tints of blue.
