

Sketchbook #7

Travel Sketching

As we prepare for the break,
your assignment this week
is to create a travel sketch or a sketch
from a location.

You will be sitting outside and trying to capture
the mood or feeling of a place with your drawing

If you are not traveling over break simply find a spot and sketch locally. It could be your house or other structure (store, park, any type of architecture).

Your sketch should include some sort of building, the space around the building (trees, sidewalk, etc.) and any people you observe.

Your sketch should also include color. Remember the purpose of sketching on location is to capture a mood and to demonstrate your ability to closely observe. Details matter!
